

California Arbovirus Surveillance Bulletin #3

Week 9 Friday, March 2, 2012

WEEKLY UPDATE

Human Cases

No human cases have been reported in 2012.

Horses

No equine cases have been reported in 2012.

Dead Birds & Squirrels

This week, 3 dead birds tested positive for **chronic*** West Nile virus (WNV) infection from Sacramento (2) and Yolo (1) counties. In 2012, 3 dead birds have tested positive (recent) for WNV from Los Angeles, Sacramento, and Santa Clara counties, and an additional 9 dead birds have tested positive for chronic WNV infection from Sacramento (7) and Yolo (2) counties.

NOTE: The statewide dead bird testing program will resume WNV testing on Monday, March 12, 2012.

**In 2010, The University of California, Center for Vectorborne Diseases (CVEC) and the California Department of Public Health, Vector-Borne Disease Section began differentiating between chronic and acute infections in WNV positive dead birds. Birds considered to have chronic infection with WNV are unlikely to have been infected recently with WNV and have limited surveillance utility.*

Mosquito Pools

No positive mosquito pools have been reported in 2012.

Sentinel Chickens

No seroconversions have been reported in 2012.

YTD WNV Activity by Element and County, 2012

County	Humans	Horses	Dead Birds	Mosquito Pools	Sentinel Chickens	Squirrels
Los Angeles			1			
Sacramento			1			
Santa Clara			1			
Totals	0	0	3	0	0	0

2011 & 2012 YTD West Nile Virus Comparisons

	2011*	2012
Total # Dead Bird Reports	672	808
# Positive Counties	2	3
# Human Cases	0	0
# Horse Cases	0	0
# Positive Dead Birds / # Tested	1 / 56	3 / 116
# Positive Mosquito Pools / # Tested	1 / 357	0 / 229
# Seroconversions / # Tested	0 / 426	0 / 294
# Positive Squirrels / # Tested	0 / 0	0 / 5

*2011 data for week 9 not available. Numbers reflect week 10.

Website Information: For updated information on WNV in California, please visit the California WNV website, www.westmile.ca.gov, or the California Vectorborne Disease Surveillance System website, www.calsurv.org. For national information on WNV and other arboviruses, please visit the CDC website, www.cdc.gov, and the USGS website, www.westmilemaps.usgs.gov

TESTING SUMMARIES

Humans and Horses

		WNV		WEEV		SLEV	
		Local	Imported	Local	Imported	Local	Imported
Human Cases	Week	0	0	0	0	0	0
	YTD	0	0	0	0	0	0
Horse Cases	Week	0	0	0	0	0	0
	YTD	0	0	0	0	0	0

Dead Birds & Squirrels

		Number Tested	WNV Positive (recent only)
Dead Birds	Week	59	0
	YTD	116	3
Tree Squirrels	Week	1	0
	YTD	5	0

Chickens & Mosquitoes

		Number Tested	WNV Positive	SLEV Positive	WEEV Positive
Chicken Sera	Week	58	0	0	0
	YTD	294	0	0	0
Mosquito Pools: RT-PCR	Week	24	0	0	0
	YTD	229	0	0	0

New Positives

Dead Birds

County	Agency	City	Zip	Species	Reported	Virus	Type of Infection	Method
Sacramento	Sacramento-Yolo MVCD	Rancho Cordova	95742	House Wren	2/19/2012	WNV	Chronic	RT-PCR
Sacramento	Sacramento-Yolo MVCD	Carmichael	95608	American Crow	2/19/2012	WNV	Chronic	RT-PCR
Yolo	Sacramento-Yolo MVCD	Davis	95616	Yellow-rumped Warbler	2/6/2012	WNV	Chronic	RT-PCR

California Arbovirus Surveillance Bulletin #3

Week 9 Friday, March 2, 2012

Test Protocols

Humans:

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing or confirmation.

Horses:

Serum or brain tissue specimens from horses displaying neurological symptoms are submitted to the California Animal Health and Safety Laboratory (CAHFS) and tested by EIA and PRNT.

Dead Birds and Tree Squirrels:

Dead birds and tree squirrels are necropsied at CAHFS laboratory at University of California, Davis. Oral swabs from American Crows and kidney tissue from all other dead birds and squirrels are forwarded to the UC Davis Center for Vectorborne Diseases (CVEC) for West Nile virus testing using the singleplex RT-PCR Taqman assay and confirmed with a second primer set.

Sentinel Chickens:

Dried blood spot specimens from sentinel chickens are submitted to the California Department of Public Health Vector-Borne Disease Laboratory and tested for the presence of antibodies to West Nile, western equine encephalomyelitis (WEEV), and St. Louis encephalitis (SLEV) viruses by EIA and IFA. Positive samples are confirmed by western-blot or PRNT.

Mosquito Pools:

Mosquito pools are submitted to CVEC and screened for WEEV, SLEV, and WNV viral RNA using a Taqman multiplex RT-PCR. CVEC will cease confirmation testing on PCR-positive pools of *Cx. tarsalis* and *Cx. quinquefasciatus* but will continue to confirm multiplex PCR-positive results for other mosquito species using singleplex RT-PCR.
