### California Arbovirus Surveillance Bulletin #12

Week 21 Friday, May 24, 2013

### **WEEKLY UPDATE**

#### **Human Cases**

No human cases have been reported in 2013.

#### Horses

No equine cases have been reported in 2013.

### **Dead Birds & Squirrels**

No West Nile virus (WNV) positive birds were reported this week. To date this year, two dead birds have tested positive for WNV from Los Angeles and Yuba counties and an additional 16 dead birds have tested positive for chronic WNV infection from 11 counties. At this time last year, 16 dead birds had tested positive for WNV from five counties.

### **Mosquito Pools**

Seven WNV positive mosquito pools were reported this week from Fresno (1), Los Angeles (3), San Joaquin (2), and Tulare (1) counties. **This is the first detection of WNV activity in San Joaquin County this year, and the first WNV positive mosquitoes detected in Los Angeles County in 2013.** To date this year, 9 mosquito pools from 4 counties have tested positive for WNV. At this time last year, 8 mosquito pools from 5 counties had tested positive for WNV.

#### **Sentinel Chickens**

No seroconversions have been reported in 2013.

#### California Arbovirus Surveillance Bulletin #12

Week 21 Friday, May 24, 2013

# **Test Protocols**

#### Humans

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing or confirmation.

#### Horses

Serum or brain tissue specimens from horses displaying neurological symptoms are submitted to the California Animal Health and Safety Laboratory (CAHFS) and tested by EIA and PRNT.

#### **Dead Birds and Tree Squirrels:**

Dead birds and tree squirrels are necropsied at CAHFS laboratory at University of California, Davis. Oral swabs from American Crows and kidney tissue from all other dead birds and squirrels are forwarded to the UC Davis Center for Vectorborne Diseases (CVEC) for West Nile virus testing using the singleplex RT-PCR Taqman assay and confirmed with a second primer set.

#### **Sentinel Chickens:**

Dried blood spot specimens from sentinel chickens are submitted to the California Department of Public Health Vector-Borne Disease Laboratory and tested for the presence of antibodies to West Nile, western equine encephalomyelitis (WEEV), and St. Louis encephalitis (SLEV) viruses by EIA and IFA. Positive samples are confirmed by western-blot or PRNT.

#### **Mosquito Pools:**

Mosquito pools are submitted to CVEC and screened for WEEV, SLEV, and WNV viral RNA using a Taqman multiplex RT-PCR. CVEC will cease confirmation testing on PCR-positive pools of *Cx. tarsalis* and *Cx. quinquefasciatus* but will continue to confirm multiplex PCR-positive results for other mosquito species using singleplex RT-PCR.
