What can you do?

Avoid mosquito bites!

Mosquitoes bite in the early morning and early evening hours.

Two hours after the sun sets is when mosquitoes bite the most.

If you go out at these times wear long pants and long sleeved shirts.

Also, use insect repellent with DEET in it. Put the repellent on your skin that is not covered by clothes.

The DEET in the insect repellent keeps mosquitoes from biting you.

Follow the directions carefully.

Keep your home safe!

Mosquitoes lay their eggs and grow in standing water.

It only takes 7 days for a mosquito egg to hatch and become an adult mosquito.

Get rid of standing water around your home.

Empty water out of buckets, old tires, flower pots and toys.

Change water every few days from pet bowls and bird baths.

Keep good screens on your windows and doors.

Screens will keep mosquitoes out.

Tell your friends and neighbors!

West Nile virus is now found throughout California.

Dead birds are a sign that West Nile virus is in your area.

Birds like crows, ravens, and jays get very sick and can die from West Nile virus.

You do not get West Nile virus from touching a dead bird.

To monitor the spread of the virus, the State is tracking dead birds.

To report a dead bird, go to
