

# California Arbovirus Surveillance Bulletin # 9

Week 16 Friday, April 23, 2010

## Weekly Summary

### WEEKLY COMMENTS

#### **Humans**

No human cases have been reported in 2010.

#### **Horses**

No equine cases have been reported in 2010.

#### **Dead Birds & Tree Squirrels**

No positive birds or squirrels were reported this week. In 2010, 6 West Nile virus (WNV) positive dead birds have been reported from 3 counties.

At this time last year, 9 birds from four counties (Fresno, Los Angeles, Orange, and San Diego) had tested positive for WNV.

#### **Mosquito Pools**

No positive mosquito pools have been reported in 2010.

At this time last year, 8 WNV positive mosquito pools had been reported from two counties (Los Angeles and Contra Costa).

#### **Sentinel Chickens**

No seroconversions have been reported in 2010.

At this time last year, 3 WNV positive chickens from Los Angeles County had been reported.

#### **YTD WNV Activity by Element and County, 2010**

## TEST PROTOCOLS

### **Humans:**

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing or confirmation by plaque reduction neutralization test (PRNT).

\*Human denominator data only includes specimens tested at VRDL and does not include additional negative specimens that are tested by local agencies only.

---

### **Horses:**

Serum or brain tissue specimens from horses displaying neurological symptoms are submitted to the California Animal Health and Safety Laboratory (CAHFS) and tested by EIA and PRNT.

---

### **Dead Birds and Tree Squirrels:**

Dead birds and tree squirrels are necropsied at CAHFS laboratory at University of California, Davis. Oral swabs from American Crows and kidney tissue from all other dead birds and squirrels are forwarded to the UC Davis Center for Vectorborne Diseases (CVEC) for West Nile virus testing using the singleplex RT-PCR Taqman assay and confirmed with a second primer set. The WNV Dead Bird Surveillance Coordinator, Erin Parker, can be reached directly at (510) 412-6254.

---

### **Sentinel Chickens:**

Dried blood spot specimens from sentinel chickens are submitted to the California Department of Public Health Vector-Borne Disease Laboratory and tested for the presence of antibodies to West Nile, western equine encephalomyelitis (WEE), and St. Louis encephalitis (SLE) viruses by EIA and IFA. Positive samples are confirmed by western-blot or PRNT.

---

### **Mosquito Pools:**

Mosquito pools are submitted to CVEC and screened for WEE, SLE, and WNV viral RNA using a Taqman multiplex RT-PCR. CVEC will cease confirmation testing on PCR-positive pools of *Cx. tarsalis* and *Cx. quinquefasciatus* but will continue to confirm multiplex PCR-positive results for other mosquito species using singleplex RT-PCR.
