

# California Arbovirus Surveillance Bulletin # 7

Week 13 Friday, April 1, 2011

## Weekly Summary

### WEEKLY COMMENTS

#### **Humans**

No human cases have been reported in 2011.

#### **Horses**

No equine cases have been reported in 2011.

#### **Dead Birds & Squirrels**

Five dead birds from 3 counties tested positive for chronic\* infection with West Nile virus (WNV), but no recent WNV infections in dead birds or squirrels were reported this week. To date this year, one WNV positive dead bird from Sacramento County has been reported, and 7 birds have tested positive for chronic WNV infection.

At this time last year, 2 birds from Los Angeles County had tested positive for WNV infection.

*\*In 2010, The University of California, Center for Vectorborne Diseases (CVEC) and the California Department of Public Health, Vector-Borne Disease Section began differentiating between chronic and acute infections in WNV positive dead birds. Birds considered to have chronic infection with WNV are unlikely to have been infected recently with WNV and have limited surveillance utility.*

#### **Mosquito Pools**

No positive mosquito pools were reported this week. In 2011, one WNV positive mosquito pool has been reported from Riverside County.

#### **Sentinel Chickens**

No seroconversions have been reported in 2011.

2010 & 2011 YTD West Nile Virus Comparisons		
	2010*	2011
Total # Dead Bird Reports	874	973
# Positive Counties	1	2
# Human Cases	0	0
# Horse Cases	0	0
# Positive Dead Birds / # Tested	2 / 78	1 / 129
# Positive Mosquito Pools / # Tested	0 / 394	1 / 685
# Seroconversions / # Tested	0 / 256	0 / 570
# Positive Squirrels / # Tested	0 / 4	0 / 1

\*2010 data for week 13 not available. 2010 numbers reflect week 12.

## TEST SUMMARIES

### Human & Horse Cases

		WNV		WEEV		SLEV	
		Local	Imported	Local	Imported	Local	Imported
Human Cases	Week	0	0	0	0	0	0
	YTD	0	0	0	0	0	0
Horse Cases	Week	0	0	0	0	0	0
	YTD	0	0	0	0	0	0

### Dead Birds & Tree Squirrels

		Number Tested	WNV Positive (recent only)
Dead Birds	Week	70	0
	YTD	129	1
Tree Squirrels	Week	1	0
	YTD	1	0

### Sentinel Chickens & Mosquito Pools

		Number Tested	WNV Positive	SLEV Positive	WEEV Positive
Chicken Sera	Week	8	0	0	0
	YTD	570	0	0	0
Mosquito Pools: RT-PCR	Week	0	0	0	0
	YTD	685	1	0	0
Mosquito Pools: RAMP	Week	0	0	N/A	N/A
	YTD	0	0	N/A	N/A

## POSITIVES

County	Agency	City	Zip	Species	Collected	Tested	Method	Result
Butte	Butte Co MVCD	Chico	95928	Tree Swallow	3/21/2011	3/29/2011	RT-PCR	Chronic WNV
Butte	Butte Co MVCD	Oroville	95965	Tree Swallow	3/21/2011	3/29/2011	RT-PCR	Chronic WNV
Madera	Madera Co MVCD	Madera	93638	Yellow-rumped Warbler	3/5/2011	3/29/2011	RT-PCR	Chronic WNV
Madera	Madera Co MVCD	Madera	93638	Yellow-rumped Warbler	3/7/2011	3/29/2011	RT-PCR	Chronic WNV
Sacramento	Sacramento-Yolo MVCD	Sacramento	95826	Anna's Hummingbird	3/17/2011	3/29/2011	RT-PCR	Chronic WNV

Week 13 Friday, April 1, 2011

## TEST PROTOCOLS

### **Humans:**

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing or confirmation by plaque reduction neutralization test (PRNT).

---

### **Horses:**

Serum or brain tissue specimens from horses displaying neurological symptoms are submitted to the California Animal Health and Safety Laboratory (CAHFS) and tested by EIA and PRNT.

---

### **Dead Birds and Tree Squirrels:**

Dead birds and tree squirrels are necropsied at CAHFS laboratory at University of California, Davis. Oral swabs from American Crows and kidney tissue from all other dead birds and squirrels are forwarded to the UC Davis Center for Vectorborne Diseases (CVEC) for West Nile virus testing using the singleplex RT-PCR Taqman assay and confirmed with a second primer set.

---

### **Sentinel Chickens:**

Dried blood spot specimens from sentinel chickens are submitted to the California Department of Public Health Vector-Borne Disease Laboratory and tested for the presence of antibodies to West Nile, western equine encephalomyelitis (WEEV), and St. Louis encephalitis (SLEV) viruses by EIA and IFA. Positive samples are confirmed by western-blot or PRNT.

---

### **Mosquito Pools:**

Mosquito pools are submitted to CVEC and screened for WEEV, SLEV, and WNV viral RNA using a Taqman multiplex RT-PCR. CVEC will cease confirmation testing on PCR-positive pools of *Cx. tarsalis* and *Cx. quinquefasciatus* but will continue to confirm multiplex PCR-positive results for other mosquito species using singleplex RT-PCR.
