

## California Arbovirus Surveillance Bulletin #7

Week 16 Friday, April 19, 2013

### WEEKLY UPDATE

#### **Human Cases**

No human cases have been reported in 2013.

#### **Horses**

No equine cases have been reported in 2013.

#### **Dead Birds & Squirrels**

No West Nile virus (WNV) positive birds were reported this week. To date this year, one dead bird has tested positive for WNV from Los Angeles County; an additional 11 birds with chronic WNV infection have been reported from Kern (1), Placer (1), Riverside (1), Sacramento (4), San Bernardino (1), Santa Clara (2), and Yolo (1) counties.

At this time last year, 4 dead birds had tested positive for WNV from Contra Costa, Los Angeles, Sacramento, and Santa Clara counties.

#### **Mosquito Pools**

No positive mosquito pools have been reported in 2013. At this time last year, one mosquito pool from Riverside County had tested positive for WNV.

#### **Sentinel Chickens**

No seroconversions have been reported in 2013.

## Test Protocols

### Humans:

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing or confirmation.

---

### Horses:

Serum or brain tissue specimens from horses displaying neurological symptoms are submitted to the California Animal Health and Safety Laboratory (CAHFS) and tested by EIA and PRNT.

---

### Dead Birds and Tree Squirrels:

Dead birds and tree squirrels are necropsied at CAHFS laboratory at University of California, Davis. Oral swabs from American Crows and kidney tissue from all other dead birds and squirrels are forwarded to the UC Davis Center for Vectorborne Diseases (CVEC) for West Nile virus testing using the singleplex RT-PCR Taqman assay and confirmed with a second primer set.

---

### Sentinel Chickens:

Dried blood spot specimens from sentinel chickens are submitted to the California Department of Public Health Vector-Borne Disease Laboratory and tested for the presence of antibodies to West Nile, western equine encephalomyelitis (WEEV), and St. Louis encephalitis (SLEV) viruses by EIA and IFA. Positive samples are confirmed by western-blot or PRNT.

### **Mosquito Pools:**

Mosquito pools are submitted to CVEC and screened for WEEV, SLEV, and WNV viral RNA using a Taqman multiplex RT-PCR. CVEC will cease confirmation testing on PCR-positive pools of *Cx. tarsalis* and *Cx. quinquefasciatus* but will continue to confirm multiplex PCR-positive results for other mosquito species using singleplex RT-PCR.
