

California Arbovirus Surveillance Bulletin #3

Week 16 Friday, April 24, 2026

WEEKLY UPDATE

Humans

No human infections have been reported in 2026.

Dead Birds

There were no new West Nile virus (WNV) positive dead birds reported this week. In 2026, 1 WNV positive bird has been reported from 1 county: San Diego (1). At this time last year, 7 WNV positive dead birds had been reported from 2 counties.

Mosquito Pools

No WNV positive mosquito pools have been reported in 2026. At this time last year, no WNV positive mosquito pool had been reported.

Sentinel Chickens

No seroconversions have been reported in 2026.

2025 & 2026 YTD West Nile Virus Comparisons		
	2025	2026
Total No. Dead Bird Reports	2,285	1,343
No. Positive Counties	2	1
No. Human Cases	0	0
No. Positive Dead Birds / No. Tested	7 / 154	1 / 75
No. Positive Mosquito Pools / No. Tested	0 / 3,163	0 / 5,335
No. Seroconversions / No. Tested	0 / 0	0 / 0

California Arbovirus Surveillance Bulletin #3

Week 16 Friday, April 24, 2026

TEST PROTOCOLS

Humans:

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing with a plaque reduction neutralization test (PRNT).

Dead Birds

Oral swab samples collected from bird carcasses are tested at the UC Davis Arbovirus Research and Training laboratory (DART) or at a local agency for West Nile virus by RT-qPCR.

Sentinel Chickens:

Dried blood spot samples from sentinel chickens are tested at the California Department of Public Health Vector-Borne Disease Laboratory for IgG antibodies to West Nile, St. Louis encephalitis, and western equine encephalomyelitis viruses by an EIA. Positive samples are confirmed by IFA, western-blot, or PRNT.

Mosquito Pools:

Mosquito pools are tested at DART or at a local agency for West Nile, western equine encephalomyelitis, and St. Louis encephalitis viral RNA using a multiplex RT-qPCR. Invasive *Aedes* mosquitoes (*Ae. aegypti* and *Ae. albopictus*) are also tested at DART for chikungunya, dengue, and Zika viral RNA by a separate RT-qPCR.

Website Information: For updated information on WNV in California, please visit the California WNV website, <https://westnile.ca.gov>, or the California Vector-Borne Disease Surveillance System website, <https://maps.vectorsurv.org>.

Prepared by the Vector-Borne Disease Section (Infectious Diseases Branch), California Department of Public Health, 850 Marina Bay Parkway, Richmond, CA 94804. Questions concerning this bulletin should be addressed to Hannah Romo: Hannah.romo@cdph.ca.gov
