

West Nile virus and other nationally notifiable arboviruses -- United States, 2026

Provisional data reported to ArboNET as of June 16, 2026

This update from the CDC Arboviral Disease Branch includes provisional data reported to ArboNET for January 1, 2026 – June 16, 2026 for human disease cases and infections caused by West Nile virus and selected other nationally notifiable arboviruses. Case counts include cases reported as confirmed or probable per national surveillance case definitions.

About ArboNET

ArboNET is a national arboviral surveillance system managed by CDC and state health departments. In addition to human disease, ArboNET maintains data on arboviral infections among presumptive viremic blood donors (PVDs), veterinary disease cases, mosquitoes, dead birds, and sentinel animals. As with other national surveillance data, ArboNET data has several limitations that should be considered in analysis, interpretation, and reporting.
